Lab 7

Based on the sample program given in lecture slides, add two more tetrominos. Show that the two tetrominos you just add appear in the output of the main function.

Hand-in Rules

Your GitLab account shall have a public repository lab7, which includes the following things:

1. Your *.cpp* and *.h* files.
2. A *Makefile*.
3. A *README* file showing how to compile your program as well as the running script.
